# ENG WORLD TECH

Engineering Company For Maintenance & Installation Of Electrical & Mechanical LTD  
Laundry Equipment, Industrial kitchen and Boilers

## Company CV in Electronic Lock Business

We are the engineering company for electrical and mechanical maintenance and installations ENG WORLD TECH Founded in 1999, we specialize in:-

### Electronic coil devices

Authorized distributors of electronic and fingerprint scanners ( ADEL LOCK - JWM )

Supply, installation, maintenance and after-sales service:-

We have an authorized maintenance center registered with No. 33525, Cairo Investment

### An overview of electronic cable devices :

#### 1- Calon R.F specifications

- It works with a card that is not affected by water, nor is it affected by magnets or the mobile phone.
- It is characterized by the fact that each chamber has 2 mechanical keys and one master key to open all chambers
- The cabin has the advantage that when the program malfunctions, it can be opened using a mechanical key due to improving service performance to the customer
- This calk is easy to use and protects the client's private belongings
- The caliper has the advantage that when pressed for more than 10 seconds on the hand, the caliper gives an audio and light alarm to prevent theft.
- It is safe because the batteries are placed inside the room to prevent anyone from stealing the batteries or disrupting the card slot
- When the batteries are changed, the dial does not need to be programmed again because it maintains the programming for a long time.
- When programming the system, only the system and programming cards are required, and no type of devices or cables are required
- Each salon maintains a detailed report on the room, including the dates of reservation, entry into the room, and the end date of the room reservation, in the name of the guest.
- This console also has the advantage that when any card other than its own is placed, the console does not crash and the internal program of the console is not affected by any of these different types of cards. Even if the card was placed in the tray more than 1000 times

#### 2- Specifications of fingerprint color and how it works

#### It can be done in three ways

- 1- Fingerprint (storage capacity up to 120 fingerprints)
- 2- Number pad (password)
- 3- Mechanical key
